

## Using Phase Manager 4 and 5 concurrently

If you already are a user of Phase Manager 4 and you are updating to Phase Manager 5, you can use each program separately.

In order to do that, you must modify the licence folder of Phase Manager 5 during the setup. Please imperatively follow the tutorial below.

### Setting up Phase Manager 5

\* Download the setup using the link in your email or using this following link

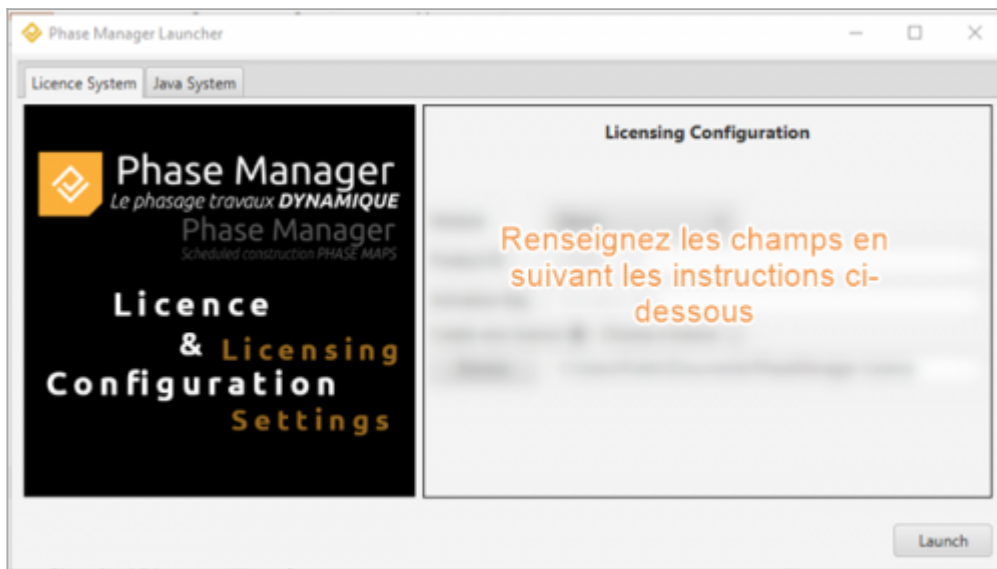

<https://docs.phasemanager.com/1-installation/0-a-setups-download>

\* Run the setup and once installation is complete, follow the tutorial below before launching Phase Manager 5 for the first time.

### License configuration and modifying the license folder

\* Once Phase Manager 5 is installed, double-click on its icon to launch it. At first launch, the license configurator will display.

**Please pay attention from now on, especially on the “License” menu.**

To activate your license, you will need to fill in the following fields:

### Module

Choose the type of license you have :

\* Monoposte = Standalone

\* Réseau = Network

\* USB = install on a USB Key

Licensing Configuration

Module **Monoposte**

## Product ID

Fill in the Product ID that's been sent to you by Projet Linéaire:

- licence pattern : LPMM-**00NNN0500**abcDEF (**NNN** is the number of your license, and **5** the version)
- **only paste the right part of your Product-ID, after the '-' :**

Module **Monoposte**

Product ID LPMM **00NNN0400abcDEF**

## Activation key

Fill in the Serial number sent to you by Projet Linéaire.

\* pattern : VccQX-37eJG-AZlce-EYk7O-temCP-8DRFu

Module **Monoposte**

Product ID LPMM 00NNN0400abcDEF

Activation... **XkcQs-ABCDE-AZHcN-12345-oemCP-zycba**

## License

Choose "Create new licence" :

**Create new licence**  Choose a licence

**Here is where you have to change the license folder.**

Indeed, the program will choose by default the following path :  
(C:\Users\Public\Documents\PhaseManager-Licence), but this folder already contains your Phase Manager 4 license. If we do not modify the folder, the Phase Manager 5 program will crush and replace the license and you will not be able to use Phase Manager 4 anymore.

**In order to do that, click on the “Browse” button and choose another folder for the Phase Manager 5 license. I suggest you to create a new folder named “PhaseManager5-Licence” in this following folder “C:\Users\Public\Documents” and be sure to choose the new folder you just created.**

Once you have choose the new folder you created for you Phase Manager 5 license, you can just click on the “Launch” Button to active it, and follow the setup tutorial.

## For a network License

The installation is the same as above, just make sure you install the network license in another folder (different from the PM4 current one).
